
In the BS core requirements, STAT:5201 can be used in place of the undergraduate equivalent STAT:3210 taken in the 4th year. Students take 4 statistics courses (stat electives) beyond the 10 BS core courses and one must be MATH:3770 for the mathematical statistics track. The 3 other electives can be fulfilled with STAT:5100, STAT:5101, and STAT:5400 (4 electives shown with a red box above).

No more than 12 s.h. can cross-count toward the BS and MS s.h., and these courses must be taken after applying to MS program (so, they usually occur in the 4th year of study). Cross-counted courses in the diagram above are STAT:5100, STAT:5400, STAT:5101, and STAT:5201.

These five courses are covered on the MS Final Examination take during the summer between the 4th and 5th year.

Apply by Feb. 15 to be considered for assistantship in spring of 4th year.

Receive BS in Statistics at end of 4th year.

Apply to 3+2 MS program at 80 credits and GPA of 3.25
