
The Statistics major in the Statistical Computing and Data Science track requires students to take 5 statistics electives (courses) beyond the 10 core courses: STAT:5810, CS:2210, CS:2230 and two statistics electives. The two other electives could be fulfilled with STAT:4540 and STAT:6560 (4 stat electives shown with a red box above).

The LDA certificate requires 21 s.h. and no more than 6 s.h. can cross-count toward the BS and the certificate. Above, the cross-count courses are chosen to be STAT:2010 and STAT:3200. The remaining courses for the 21 s.h. are shown with a blue box above.
