BS in Statistics (showing 10 core courses and three emphasis tracks)

Students must also take either 4 more electives for the BiGR and Math/Stat track, or 5 more electives for the stat computing track. Common prerequisites for statistical electives are STAT:3101 and/or STAT:3200 (shown with red outlines in above diagram), and these two courses should be completed as early as possible.

**See advisor for other possible choices of computer science courses in the SCDS track.**
