Title of Course: STAT:3200:0001
Course meeting time and place: 10:30 a.m. – 11:20 a.m., 112 MH
Department of Statistics and Actuarial Science: https://stat.uiowa.edu

Course ICON site: To access the course site, log into Iowa Courses Online (ICON) https://icon.uiowa.edu/index.shtml using your Hawk ID and password.

Course Home
For Undergraduate Courses: The College of Liberal Arts and Sciences (CLAS) is the home of this course, and CLAS governs the add and drop deadlines, the “second-grade only” option (SGO), academic misconduct policies, and other undergraduate policies and procedures. Other UI colleges may have different policies.
For Graduate Courses: The College of Liberal Arts and Sciences (CLAS) is the home of this course, and CLAS governs the policies and procedures for its courses. Graduate students, however, must adhere to the academic deadlines set by the Graduate College.

Instructor
Lan Luo, Assistant Professor, Department of Statistics and Actuarial Science
Office location: 205 SH
Office hours: MWF 11:20 a.m. – 12:20 p.m., or by appointment
Phone: 206-384-6535
E-mail: lan-luo@uiowa.edu

Graders:
(1) From 1/18 to 2/17: Jocelyne Horanituze, Tuesday 11 a.m. – 13:00 p.m., 350 SH, jocelyne-horanituze@uiowa.edu
(2) From 2/20 to 5/5: Zhenhan Fang, Monday 12:30 p.m. – 14:30 p.m., 366 SH, zhenhan-fang@uiowa.edu

DEO: Kung-Sik Chan, 241 SH, kung-sik-chan@uiowa.edu

Description of Course
Coverage includes examining and transforming data; modeling strategies; simple, multiple and dummy variable regression models; ANOVA; diagnostics of influential data; model checking; model selection; logistic regression; and other topics if time permits.

Learning Objectives
The main topic of this course is regression analysis, which involves data modeling, as well as diagnostic methods (to see if the model fits well) and statistical inference (to see how much we can infer from the fitted model about the population from which the data
have been collected). This is an applied statistics course, and most of your work will involve data analysis, computing, and communicating statistical results.

**Prerequisites:** STAT:2020 or STAT:2010 or STAT:3120

**Optional Textbook/Materials**
*Applied Regression Analysis & Generalized Linear Models, third edition, by John Fox.*

We will use the R software extensively in this course. R is open-source statistical software and is freely available at [http://www.r-project.org](http://www.r-project.org). I also recommend using RStudio (is now Posit) available at [https://posit.co/downloads/](https://posit.co/downloads/), an integrated development environment for R, to interact with R.

**Academic Honesty and Misconduct**
All students in CLAS courses are expected to abide by the CLAS Code of Academic Honesty. Undergraduate academic misconduct must be reported by instructors to CLAS according to these procedures. Graduate academic misconduct must be reported to the Graduate College according to Section F of the [Graduate College Manual](#).

*Discussions/collaborations on homework problems are encouraged, but you should write your own solutions independently. You are not allowed to discuss with others in exams.* All exams will allow one letter-sized two-sided cheat sheet.

**Student Complaints**
Students with a complaint about a grade or a related matter should first discuss the situation with the instructor and/or the course supervisor (if applicable), and finally with the Director or Chair of the school, department, or program offering the course.

Undergraduate students should contact [CLAS Undergraduate Programs](#) for support when the matter is not resolved at the previous level. Graduate students should contact the CLAS [Associate Dean for Graduate Education and Outreach and Engagement](#) when additional support is needed.

**Drop Deadline for this Course**
You may drop an individual course before the deadline; after this deadline you will need collegiate approval. You can look up the [drop deadline for this course](#) here. When you drop a course, a “W” will appear on your transcript. The mark of “W” is a neutral mark that does not affect your GPA. Directions for adding or dropping a course and other registration changes can be found on the [Registrar’s website](#). Undergraduate students can find policies on dropping and withdrawing [here](#). Graduate students should adhere to the [academic deadlines](#) and policies set by the Graduate College.

**Grading System and the Use of +/-**
Final grades will be awarded based on the following ranges:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>98-100</td>
</tr>
<tr>
<td>A</td>
<td>92-97</td>
</tr>
<tr>
<td>B+</td>
<td>87-89</td>
</tr>
<tr>
<td>B</td>
<td>83-86</td>
</tr>
<tr>
<td>C+</td>
<td>77-79</td>
</tr>
<tr>
<td>C</td>
<td>73-76</td>
</tr>
<tr>
<td>D+</td>
<td>67-69</td>
</tr>
<tr>
<td>D</td>
<td>63-66</td>
</tr>
<tr>
<td>F</td>
<td>59-00</td>
</tr>
</tbody>
</table>

Directions for adding or dropping a course and other registration changes can be found on the [Registrar’s website](#). Undergraduate students can find policies on dropping and withdrawing [here](#). Graduate students should adhere to the [academic deadlines](#) and policies set by the Graduate College.
Course Grades
Final course grades will be assessed based on your performance in the following activities:

Homework assignments (20%): homework assignments will be given bi-weekly, and 5 highest scores out of 6 will be counted towards the final grades. Homework is due at 11:59 p.m. on Wednesdays. Please submit an electronic version to ICON site. While assignments do not have to be type-written, please provide figures or R code, when applicable. Late/no submission will be scored zero.

Quizzes (20%): To ensure that students are completing the course readings and understanding the material, regular quizzes will be given every two or three weeks on Fridays. Each quiz takes 20 minutes (from 11:00 a.m. to 11:20 a.m.), and late/no submission will be scored zero. The 2 highest scores out of 3 will be taken into final grades. Make-up quizzes are not allowed.

Exams (60%): One midterm (25%) and one final exam (35%) will be given. Each exam will cover material from approximately half of the course, including information presented in lectures, and homework assignments. The exams will test students’ knowledge of basic concepts, terms, and general trends discussed in the course.

Date and Time of the Final Exam
The final examination date and time will be announced by the Registrar generally by the fifth week of classes and it will be announced on the course ICON site once it is known. Do not plan your end of the semester travel plans until the final exam schedule is made public. It is your responsibility to know the date, time, and place of the final exam. According to Registrar’s final exam policy, students have a maximum of two weeks after the announced final exam schedule to request a change if an exam conflict exists or if a student has more than two exams in one day (see the policy here).

Calendar of Course Assignments and Exams

<table>
<thead>
<tr>
<th>Assignment type</th>
<th>Due date</th>
</tr>

College of Liberal Arts and Sciences (CLAS) Course Policies

**Attendance and Absences**
University regulations require that students be allowed to make up examinations which have been missed due to illness or other unavoidable circumstances. Students with mandatory religious obligations or UI authorized activities must discuss their absences with me as soon as possible. Religious obligations must be communicated within the first three weeks of classes.

**Exam Policies**

**Communication: UI Email**

Students are responsible for all official correspondences sent to their UI email address (uiowa.edu) and must use this address for any communication with instructors or staff in the UI community. When emailing about this course, please put “STAT3200” into the subject line. Emails to the instructor or TA could be organizational issues, such as requests for appointments, questions about course organization, etc. In general, discussion on technical issues over email lacks efficiency, and we strongly encourage solving those problems during office hours. Technical issues are questions concerning how to approach a particular problem, or whether a particular solution is correct.

**Where to Get Help**
